

Aditi Anand Jadhav

Full Stack Developer — Cloud — DevOps

(+91) 9322459002 — aditياج100@gmail.com — LinkedIn — Portfolio

PROFILE

Full-stack Developer with nearly 2 years of experience designing, developing, and deploying scalable enterprise applications. Skilled in Java, Spring Boot, React.js, Python, FastAPI, REST APIs, microservices, Docker, Kubernetes, AWS, Google Cloud Platform (GCP), and CI/CD, with expertise in cloud-native development, DevOps, and AI-powered solutions.

EDUCATION

MKSSS's Cummins College of Engineering for Women, Pune

Pune, Maharashtra

Bachelor of Technology - Information Technology

2020 – 2024

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Lighthouse Audits

Backend: Spring Boot, REST APIs, Java, Python, SQL, NoSQL, REST APIs, GraphQL, Microservices, Spring Security, JWT

DevOps: Docker, Kubernetes, Jenkins, GCP, AWS, CI/CD, SonarQube, GitHub Actions

Testing: Unit Testing, BDD, TDD, Cucumber, Mockito, JUnit, JMeter, Playwright

Monitoring: Prometheus, Grafana

WORK EXPERIENCE

Publicis Sapient

Gurugram, India

Associate Software Development Engineer

Marriott – Cloud / DevOps Engineering Project

Aug 2026 – Present

- Supporting **DevOps and cloud deployment activities** for enterprise applications, including application deployments, environment management, and release coordination.
- Contributing to **CI/CD workflows** to automate application build, deployment, and release processes, improving deployment consistency and reducing manual intervention.
- Supporting containerized application deployments and troubleshooting **deployment, environment, and runtime issues** across cloud-based environments.
- Collaborating with development and DevOps teams to investigate deployment failures, resolve production issues, and improve application reliability.
- Participating in **deployment monitoring, release validation, production support, and operational troubleshooting**.

AI-Powered Photo Intelligence Platform

Feb 2026 – July 2026

- Developed scalable backend services using **Python, FastAPI, and GCP** for automated image validation, duplicate detection, face grouping, event classification, and contextual photo analysis.
- Built preprocessing pipelines to process uploaded ZIP-based photo collections, validate image assets, extract metadata, and store processed files in **Google Cloud Storage (GCS)**.
- Designed and integrated a custom **Model Context Protocol (MCP) tool** to enable AI-driven image analysis, classification, clustering, workflow orchestration, and structured report generation.
- Developed backend workflows integrating **MCP, REST APIs, cloud services, and AI processing components** for automated batch image analysis.
- Containerized backend services using **Docker** and deployed applications on **Google Cloud Run** through automated CI/CD workflows.

Enterprise Fraud Detection Platform – NatWest Bank

Oct 2025 – Feb 2026

- Developed backend services using **Java, Spring Boot, REST APIs, Microservices, and PostgreSQL** for enterprise fraud detection and suspicious transaction management.
- Designed and implemented RESTful APIs and PostgreSQL database schemas for **fraud case management, audit logging, transaction processing, and risk-scoring workflows**.

- Implemented **Spring Security, JWT authentication, and Role-Based Access Control (RBAC)** to secure backend APIs and enforce authorization.
- Containerized microservices using **Docker** and deployed applications on **Kubernetes / AWS EKS** for scalable cloud-based execution.
- Automated application builds and deployments using **GitHub Actions and CI/CD pipelines**, supporting consistent releases across environments.

Economic Crime Prevention Platform – Lloyds Bank

Apr 2025 – Sep 2025

- Developed and maintained backend components using **Java and Spring Boot** for cloud-native banking applications and economic crime prevention workflows.
- Developed and integrated **REST APIs and microservice components** to support application workflows and service-to-service communication.
- Built and maintained **Jenkins CI/CD pipelines** to automate application builds, testing, Docker image creation, deployment, and release workflows.
- Containerized applications using **Docker** and deployed cloud-native workloads on **Google Cloud Platform (GCP), including Cloud Run**.
- Managed **Google Cloud Storage (GCS)** resources and supported cloud-based application workflows and deployment environments.
- Troubleshoot build, deployment, and runtime issues to improve **deployment reliability and production stability**.

Banking Analytics Platform – Lloyds Bank

Dec 2024 – Feb 2025

- Developed and supported enterprise backend and ETL/ELT workflows using **Java, Spring Boot, and GCP** for banking analytics applications.
- Monitored production services and data pipelines using **Prometheus and Grafana**, investigating application failures, pipeline issues, and performance bottlenecks.
- Performed production troubleshooting and root-cause analysis for **data processing failures, workflow issues, and service reliability problems**.
- Improved application reliability through monitoring, deployment support, and optimization of backend data-processing workflows.

Projects

Android Botnet Detection Using Machine Learning

- Developed a machine learning-based Android malware detection system using Python to identify botnet behavior and malicious applications, achieving **92% classification accuracy**.
- Reduced false positives by approximately **30%** through feature engineering, network traffic analysis, and data preprocessing techniques.
- Applied supervised machine learning algorithms for malware classification and performance evaluation.

Bank Token Management System

- Developed a banking queue management system using **Java and SQL** to automate token generation and customer queue management.
- Improved customer service efficiency by approximately **25%** through workflow automation and optimized queue processing.
- Designed a user-friendly interface for token generation, queue tracking, and service management.

Certifications

- **AWS Certified AI Practitioner** (2026)
- **AWS Certified Cloud Practitioner** (2026)
- **Google Cloud Digital Leader** (2025)
- **AWS Partner Accreditation (Technical)** (2025)
- Cloud Computing Program – IIT Bhubaneswar
- Web Development Program – IIT Bombay
